On behalf of the entire college, I would like to welcome you to Rose State, the #1 choice for community colleges in the Oklahoma City metro area. You will find we are a college dedicated to providing academic excellence and exceptional student services.

Along with the guidance of professors unsurpassed in providing support to the student body and the multitude of services to strengthen your academic efforts, we offer this Resource Guide. This is essential information at your fingertips to ensure you accomplish all you aspire to achieve while working towards your degree or certification.

Within the Resource Guide, students will find information on student support services, academic labs and tutoring, wellness, student life, and graduation services.

Furthermore, the Rose State College campus is bustling with new activities and projects to provide our students the experience of a four-year university at a two-year college. The latest projects include a brand-new Student Union on the west side of campus. The new Union will be built to provide Advisement, Admissions, Student Engagement, a food court, bookstore, and meeting spaces, all in one location for a one-stop-shop experience.

In addition to the LRC, Rose State College’s STEM Center offers students a cutting-edge opportunity in the MOOG Advance Manufacturing Learning Lab complete with a metal 3D printer.

The transformation continues with a new PearsonVue Cyber Testing Center located in the Professional Training building. No matter the certification you need to take, Rose State is here to assist with all levels of continuing education units.

We hope this Resource Guide is helpful and trust with the many resources on campus our students are equipped to handle any challenge that may come their way. Please take a moment to browse through the guide, see what we offer, and how our facilities and staff can help you achieve your career goals.
