Before an individual may enroll in any 1000 or 2000-level cyber security coursework, s/he must complete the following.

**INFOSEC Background Review**

I understand most prospective employers will conduct background checks prior to hiring a new employee, and this is particularly true in the area of information / cyber security. I further understand individuals seeking employment in Information Technologies with anything other than a clear criminal history may experience great difficulty obtaining employment, and this is especially true in the information security field.

Further, I understand I am fully responsible for my personal conduct, and acknowledge that engagement in any illicit activities (e.g. illegal drug use, computer fraud) may hinder employment opportunities.

Signature ___________________________ Date __________________

**INFOSEC Ethics Agreement and Release**

I fully understand that the skills and knowledge acquired through information / cyber security coursework in the Rose State College Cyber Security program are intended for use in assisting individuals and/or organizations with protecting their information technology and telecommunications assets and investigating illicit activities. Therefore, I agree to take full responsibility for all reasonable precautions to ensure that the skills and knowledge gained from Rose State College’s information / cyber security coursework is not to be divulged to any third parties or used for malicious purposes.

In addition, I recognize that I am accountable for following rules governing the use of institutional resources (e.g. computers, networks, and facilities), and that any inappropriate or unlawful use of Rose State College resources may result in the termination of access privileges, disciplinary review or legal action.
