Suggested Study Plan for Rose State College Engineering students planning to major in Aerospace, Architectural, Biosystems, Chemical, Civil, Industrial, or Mechanical Engineering at Oklahoma State University

This is a suggested study plan to meet requirements of an Engineering Associates Degree (General Option). The arrows indicate the order in which courses should be taken according to prerequisites. Each student should develop their own study plan which suits their needs, meets the degree requirements listed in the Rose State College Catalogue, and follows prerequisites. (Updated May 2017)

* These courses can be substituted to meet degree requirements with approval of Engineering and Science Division Dean.
